

MADANI SAI VARDHAN

Aspiring Machine Learning Engineer & Data Scientist

+91 6302671238 | madanisaivardhan@gmail.com | Nizamabad, Telangana, India | github.com/Sai-Vardhan12 | linkedin.com/in/sai-varadhan-madani-25488330a

PROFESSIONAL SUMMARY

Computer Science & Engineering (Data Science) graduate with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and Data Analytics. Proficient in Python, SQL, and AI/ML frameworks. Completed a Data Science internship involving large-scale medical image annotation for AI model training. Passionate about building intelligent, data-driven solutions to solve real-world problems.

EDUCATION

Bachelor of Technology – Computer Science & Engineering (Data Science) 2022 – 2026

Vardhaman College of Engineering, Hyderabad | CGPA: 8.27 / 10

Intermediate (MPC) – S.R. Junior College 2020 – 2022

Percentage: 96.4%

High School – Vijay High School 2020

CGPA: 10.0 / 10

INTERNSHIP EXPERIENCE

Data Science Intern – Solaiera (solaiera.ai) February 2026 – May 2026

- Annotated and validated 400+ dental medical images using bounding box and polygon segmentation on Roboflow.
- Managed annotation workflows, defined object classes, and ensured label consistency across large-scale datasets.
- Conducted QA checks to identify missing labels, misclassifications, and duplicate annotations.
- Contributed to preparing machine-learning-ready datasets for computer vision object detection and classification models.

PROJECTS

AI Security Log Analyzer Python · XGBoost · SHAP · Streamlit

- Built a multi-source AI security analytics platform using CICIDS2017 network traffic and HDFS log data.
- Implemented XGBoost intrusion detection, Isolation Forest anomaly detection, and SHAP explainability with a real-time Streamlit dashboard and alert prioritization engine.

HyperVision – Hyperspectral Image Detection CNN · PCA · SHAP · Python

- Developed a CNN-based hyperspectral object detection system using PCA for dimensionality reduction and spatial-spectral patches.
- Integrated drift detection, adaptive learning, and SHAP-based explainability to improve model accuracy and interpretability.

MediBot – AI Medical Assistant Chatbot Python · NLP · Healthcare AI

- Built an intelligent healthcare chatbot enabling users to track symptoms, manage medications/appointments, and receive fast conversational health guidance.
- Incorporated urgent-concern flagging logic to guide users toward professional care when needed.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

Databases: MySQL, PostgreSQL

AI / ML: Machine Learning, Deep Learning, Computer Vision, NLP, Generative AI

Libraries & Tools: Pandas, NumPy, Scikit-learn, Streamlit, Roboflow, Power BI, Excel, Data Visualization

Domains: Data Analytics, Data Science, Image Annotation, Dataset Validation

CERTIFICATIONS

NPTEL: Data Analytics with Python

Oracle: Cloud Infrastructure (OCI), Oracle DBA 21c

Others: AI for Beginners, Cybersecurity Awareness (HP), Lingua Skill Business English (Cambridge)
